SOME FLOWFIT FEATURES

PROJECT MANAGEMENT

Customizable and flexible workflow creation. Project managers are able to track translation, proofreading, quality control etc. by internal/external resources. Translators/editors are able to send and retrieve emails directly through FlowFit advanced Outlook integration.

TIME MANAGEMENT

Create projects, manage team workload and monitor projects in real-time. Simple timesheets allow for clear overview and more efficient resource management.

FLOWFIT REPORT PORTAL

Over twenty-five detailed reports on your company's productivity, cost management and financial performance. Instantly share and export reports as a PDF, Word or Excel file.

DELIVERY MANAGEMENT

Project delivery to client via e-mail, download link or client portal.

TASK & WORKLOAD MANAGEMENT

Manage projects, resources and workload at-a-glance and allow your team to access assigned tasks for all their projects.

REAL-TIME DASHBOARD

Clear overview of project's status along with automated emails to notify your team when tasks are available.

FLOWFIT CLIENT PORTAL

Clients can upload documents, request quotes and track ongoing projects.

FLOWFIT FREELANCER PORTAL

Freelancers can download projects, deliver finalized documents and create invoices in a web based portal.

INVOICE MANAGEMENT

Create, manage and control incoming and outgoing invoices. Pre-defined templates to simplify the invoicing process and payment schedule management.
