

Introducing FlowFit, your Language Project Management Solution

Introducing FlowFit, your Language Project Management Solution designed to seamlessly blend collaboration and automation, enhancing productivity and efficiency for streamlined language projects. Explore the capabilities of FlowFit, save time, reduce costs, and enhance your skills. Dive into flexible features, gain real-time insights, and make informed decisions on a highly secure platform, as FlowFit has obtained cybersecurity certification from the Canadian Government, along with SOC2 Type I and II certifications.

Ready to streamline your language projects? Check out FlowFit today!

Main FlowFit Advantages

Significantly reduce your management costs by using FlowFit to create, track and manage the progress of your projects, while enabling real-time management of resource workloads.

Benefit from clear, detailed planning that provides an accurate overview. Real-time resource management allows you to maximize operational efficiency by assigning tasks efficiently.

Get a complete solution by integrating FlowFit with your translation tool, whether it is a translation memory or machine translation tool such as memoQ TMS, Trados GroupShare, LogiTerm, Alexa Translations A.I., Systran and Intento, ensuring a smooth and efficient experience.

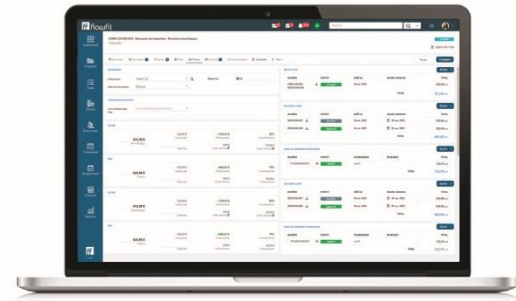

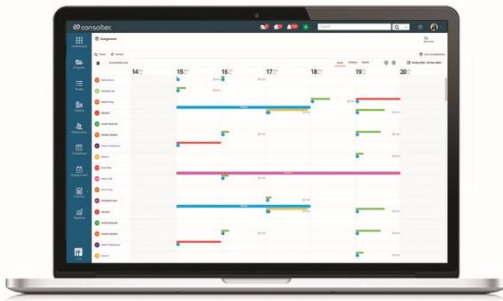

Trust FlowFit to manage your translation projects securely. Certified as cybersecurity by the Canadian government, as well as holding SOC2 Type I and II certifications, our platform offers total peace of mind when it comes to the confidentiality and integrity of your sensitive data.

Among our clients

Main Features of **ff** flowfit

Your Linguistic Project Management Solution

Project Management Portal

Empower your project and task management with FlowFit's central hub. This portal streamlines processes by automating repetitive tasks, customizing workflows, facilitating information sharing, and simplifying the delivery process.

Translation Tool Integration

Experience seamless integration with popular translation tools, including memoQ TMS, Trados GroupShare, Logi-Term, Alexa Translations AI, Systran, and Intento. FlowFit ensures a cohesive workflow with these tools, enhancing your translation efficiency.

Resource Management

Enable multi-team management with FlowFit's resource module. Define skills and availability for each resource and evaluate performance effectively. Enhance workforce management and project execution with this comprehensive module.

Provider Portal

Facilitate supplier engagement with a configurable portal. Providers can access tasks, submit documents, indicate availability, and seamlessly submit invoices. Enhance collaboration and streamline communication with FlowFit's Provider Portal.

Workload Optimization

Optimize project resource allocation with FlowFit's assignment module. Monitor workload, manage availability, and select the most suitable resources to ensure efficient project execution.

Timesheets

Efficiently manage time allocation by task, project, and activity using FlowFit's timesheet module. Quantify internal resource productivity and enhance project planning with detailed time tracking.

Statistical Reports

Access over 25 statistical reports through FlowFit's reporting module. Gain insights into production, deadlines, resource productivity, cost tracking, word counts, and more. Make informed decisions based on comprehensive project analytics.

Customization

Tailor FlowFit to your company's unique needs with its highly customizable features. Consoltec offers both local and hosted solutions, along with single sign-on capabilities for a seamless user experience.

Emails

Centralize project-related information by storing all associated emails in FlowFit's project history. Create projects directly from emails with just a few clicks, streamlining communication and project initiation.

Client Portal

Set up your custom client portal in FlowFit to easily submit and track requests, handle quotes and invoices, communicate with managers, upload documents, and access a complete request history. Stay organized and connected with this versatile client-centric platform.

Financial Features

Effectively manage budgets, quotes, and invoices with FlowFit's financial management module. Gain a comprehensive overview of internal and external costs, estimated and actual margins, and ensure financial success in your projects.

Automation

Harness the power of automation with FlowFit's virtual coordinator. Automate various actions based on specific rules to streamline processes, tackle complex tasks, and boost efficiency and productivity, all while reducing costs.
